

**PhD position at International Max Planck Research School (IMPRS)  
„From Molecules to Organisms“**

The IMPRS “From Molecules to Organisms” is an international PhD program offered jointly by the Max Planck Institute for Developmental Biology, the Friedrich Miescher Laboratory and the Eberhard Karls University in Tübingen, Germany.

Interdisciplinary research topics range from structural biology, molecular and cellular biology, bioinformatics, molecular genetics in plant and animal models, developmental biology, evolution, to natural variation and ecology.

*We offer:*

- Cutting-edge research projects
- Excellent research facilities
- Financial support
- Supporting curriculum with many optional courses
- International environment with English as the working language

More information and online application at <http://www.tuebingen.mpg.de>

Next application deadline: May 31, 2011
