

August 2013

## Postdoc positions in plant development

Post-doctoral positions in biology of florigen, Cytokinin and the developmental potential of meristem in tomato, are available in the Lifschitz lab in the department of Biology at the Technion – Israel Institute of Technology, Haifa, Israel.

We combine genomic (Hi-seq), genetic and developmental approaches to understand the regulation of shoot architectures, growth and organogenesis by the Florigen and Cytokinin hormones in tomato.
