

**International Max Planck Research School (IMPRS)**  
**“From Molecules to Organisms”**

The IMPRS “From Molecules to Organisms” is an international PhD program in the life sciences based in Tuebingen, Germany. The Max Planck Institute for Developmental Biology runs the program in conjunction with the Friedrich Miescher Laboratory and the Eberhard Karls University Tuebingen.

Interdisciplinary research topics cover the fields of structural biology; molecular and cell biology; bioinformatics; biophysics; plant and animal developmental biology; evolution, ecology and genomics.

*We offer:*

- Cutting-edge research projects
- Excellent research facilities
- Financial support
- Supporting curriculum with many optional courses
- International environment with English as the working language

More information and online application at [www.imprs.tuebingen.mpg.de](http://www.imprs.tuebingen.mpg.de)

Next intake of new students: September 2013

Application deadline: March 7, 2013
