

### **Postdoctoral Associate, Genome-scale characterization of ubiquitination in plant-microbe interactions**

A full-time Postdoctoral Research Associate position is available in the Biology Department of University of Arkansas at Little Rock to characterize at genome-scale the roles of ubiquitination, particularly E2 ubiquitin-conjugating enzymes in plant immunity. Candidates must have a PhD degree in plant biology, plant pathology or a closely related discipline, have research experience in molecular host-microbe interactions as well as good writing/oral communication skills, and possess a record of significant peer-reviewed publications. Highly motivated candidate with research background in the ubiquitination system or protein biochemistry is desirable. The position is available immediately and will remain open until filled.

To apply for this position, send a cover letter, a statement of research interests and a CV including the names of three referees to Dr. Zeng (<http://ualr.edu/biology/>), [lxzeng@ualr.edu](mailto:lxzeng@ualr.edu). Applications will be reviewed beginning on May 1, 2012.

The University of Arkansas at Little Rock is an equal opportunity, affirmative action employer. Under Arkansas law, all applications are subject to disclosure. Persons hired must have proof of legal authority to work in the United States.
