

Donald Danforth Plant Science Center

Post-Doctoral Associate Position

A post-doctoral associate position is available immediately in the Pandey lab at the Donald Danforth Plant Science Center; St. Louis, Missouri (www.danforthcenter.org/pandey) to study **G-protein regulated ABA signaling pathways in Arabidopsis**. The position requires a strong background in Arabidopsis molecular genetics, molecular biology and biochemistry. Experience with protein-protein interaction assays including Y2H, BiFC and in planta coIP and localization studies with plant-based and/or protoplast-based methods is desirable.

The candidate should be highly motivated, able to work independently or in groups and effective communicators.

To apply please submit a CV with three or more references and their full contact information to Ms. Billie Broeker, Director, Human Resources, by email to (bcbroeker@danforthcenter.org) with Pandey Lab in the subject line or email it directly to Dr. Sona Pandey at spandey@danforthcenter.org

The Donald Danforth Plant science Center is a not-for-profit organization with excellent facilities for modern plant research. Salaries offered will be commensurate with degree and years of experience. Excellent benefits package is offered. The Danforth center is an equal opportunity/affirmative action employer and encourages applications from underrepresented groups, including minorities, women and people with disabilities.
