

Postdoctoral Positions in Brassica Genetics and Genomics

Two Postdoctoral Research Associate positions are immediately available to work on Brassica Genetics and Genomics at the Laboratory of Prof. Yong Pyo Lim (www.yplim.info) in the Department of Horticulture, Chungnam National University, Daejeon 305 764, Republic of Korea.

The first position is for candidates with demonstrated experience in construct making, plant transformation, microspore culture, genetic screening and other functional genomics in crop plants especially in *Brassica* crops.

The second position is for successful candidates who have hands on experiences and demonstrated ability of epigenetic research, molecular cell biology, genome wide small RNA/microRNAs profiling, genome/transcriptome sequencing and handling of next generation sequence datasets. Candidates with bioinformatics skills will have advantage.

Salary is commensurate with experience and qualifications. We encourage only those candidates to apply who are well organized, ability to manage time effectively, design and conduct experiments, can work in multicultural environment and have excellent communication and writing skills in addition to having publications in high impact journals. Please email your cover letter, curriculum vitae, and three reference letters directly from referees to Dr. Nirala Ramchiary (nrudsc@gmail.com), or Prof Yong Pyo Lim (yplim@cnu.ac.kr).
