

Postdoctoral scholar position at the University of Helsinki: Mapping the regulatory circuit linking growth and development to innate immunity in plants

The Department of Biological and Environmental Sciences at the University of Helsinki invites applications for a postdoctoral scholar – employee position available immediately. A doctoral degree in biochemistry, molecular biology, and genetics is required. Proven skills in both oral and written scientific English are essential. The position is funded by a Biocentrum Helsinki Grant. A strong background in protein-protein interactions is highly desirable. The project entails the characterization of protein complexes involved in the integration of light and hormonal signaling in Arabidopsis. The deadline for applications is 28th December, 2009.

To apply, please send a single PDF file including CV, research experience, a publication list, and names and contact information of three references to Dr. Jing Li (jing.li@helsinki.fi).
